

\$300 BOUNTY!
OFFERED BY
CITY OF LOUISVILLE,
IN ADDITION TO THE
UNITED STATES BOUNTY.

The City of Louisville will pay a Bounty of \$300 to each volunteer who may hereafter be enlisted in the United States military service, when a certificate is presented showing that a credit has been given to the City of Louisville for the person enlisted or mustered in as above.

Forney M. WM. KATE, Mayor.

Our subscribers, or many of them, are in our debt for subscription up to the 1st of January, 1862. We trust they will come up and settle their accounts without further notice.

We beg leave to say to all those who may wish to publish in our columns recommendations of men for office, that their publications must be paid for. Any other rule would be very unjust to ourselves.

On the first of January we adopted a new system of disposing of the Journal to city subscribers. We contracted to sell the papers to two responsible and efficient men, securing to them the exclusive right to all demands within the limits of the corporation of Louisville. Several important reasons influenced us in adopting this system—

First. To enable every one to take the Journal for a short or long time.

Second. To insure a more perfect delivery to subscribers.

Third. To secure a more general circulation, and a more prompt collection. The carriers are required to pay us at the end of every month for the full number of papers ordered by them.

In order that the carriers may meet their bills it is necessary for them to square accounts with their patrons at least once every month.

By this prompt way of doing business the subscriber always knows just how he stands. No long accounts are made and no differences occur when the bill is presented for settlement.

We do not see how any responsible collections can be urged against this plan. It is easier to meet and pay small bills often than it is to settle a large account of long standing. Our subscribers are enabled daily to purchase news, reports, &c., and we do not, the idea of creating a bill at the market-stall, has never been entertained by them.

They prefer to make cash payments for the articles purchased, simply because it is an every-day and a retail business. Open accounts, when a small business is transacted, pave the way for disputes over settlements. We desire to simplify the business of our office, and wish to avoid all disputes likely to arise from a general credit system to each of our thousands of subscribers. The plan of farming out our paper, we are convinced, is a good one. The carrier is interested in the enterprise; therefore a more prompt delivery of the Journal is insured. This alone should outweigh all objections urged against the arrangement. The system that we have adopted has been found by long experience in the Eastern cities to be most satisfactory to subscribers as well as publishers, and not one of the gentlemen who object to its enforcement in this city would hesitate to comply with it were it not for the arrangement.
